JUNIOR FULL-STACK DEVELOPER | SOFTWARE ENGINEERING CO-OP

Analytical • Adaptable • Collaborative

PROFILE

Software Engineering Technology (Co-op) student with a 3.98 GPA with hands-on experience building responsive, database-driven web applications using JavaScript, HTML5/CSS3, REST APIs and SQL. Brings 10+ years of customer-facing, operational and team-lead experience, with proven strength in translating business requirements into organized, user-focused technical solutions.

HIGHLIGHTS OF QUALIFICATIONS

- **Full-Stack Web Development:** Built responsive HTML5/CSS3/JavaScript interfaces integrated with RESTful APIs and Google Maps
- **Database Design & SQL:** Designed normalized Oracle schemas with ERDs, constraints, indexes, triggers and SQL reports
- **Software Development Lifecycle:** Applied OOP, requirements analysis, debugging, testing and Git within Agile/Scrum
- **Data Analysis & Reporting:** Produced dashboards, reports and presentations that turn data into stakeholder insights
- **Self-Directed Learner:** Independently researched, built and delivered a responsive website for a real-world event

TECHNICAL & TRANSFERABLE SKILLS

Programming Languages: JavaScript, Python, Java, C#, SQL, HTML5, CSS3

Web Development: Responsive Design, REST APIs, AJAX, DOM Manipulation, HTML5 Canvas, Google Maps API

Databases: Oracle Database, Oracle SQL Developer, Relational Modelling, ERDs (Microsoft Visio)

Tools & Platforms: Git, GitHub, Visual Studio Code, Visual Studio, Google Colab, Windows, Linux

Practices: OOP, SDLC, Agile/Scrum, Requirements Analysis, Debugging, QA Testing

Computer Skills: Microsoft Office (Word, Excel, PowerPoint, Outlook)

Soft Skills: Stakeholder Communication, Problem Solving, Team Leadership, Adaptability

EDUCATION

Advanced Diploma, Software Engineering Technology (Co-op)

Expected April 2028

Centennial College, Toronto, ON | **GPA: 3.98**

Relevant Courses: Object-Oriented Programming, Client-Side Web Development, Database Concepts, Software Requirements, Software Testing & QA, Mobile Application Development

Advanced Diploma, Business Administration – Marketing

June 2017

George Brown College, Toronto, ON

ACADEMIC & INDEPENDENT PROJECTS

Wedding Website | Independent Web Development Project **May 2026 – August 2026**

HTML5, CSS3, JavaScript, Responsive Design

- Designed and delivered a responsive website serving as the central information hub for a real-world wedding event
- Applied responsive, mobile-friendly design principles to ensure an accessible experience across desktop and mobile devices
- Organized content and navigation around practical guest needs, simplifying access to key event details
- Independently researched, implemented and troubleshooted technical solutions throughout the development lifecycle

Flame Grill Restaurant Web Application | Centennial College, COMP 125 **January 2026 – April 2026**

HTML5, CSS3, JavaScript, AJAX, REST APIs, Google Maps API

- Developed a responsive multi-page web application featuring menu browsing, online ordering, gallery and location services
- Integrated REST APIs via AJAX to retrieve live weather data and embedded the Google Maps API for locations and transit routes
- Engineered a JavaScript data visualization dashboard from a CSV dataset, applying data cleaning, normalization and linear regression
- Managed client-side state with localStorage, cookies and query strings; built an interactive HTML5 Canvas game with touch support

Subscription Sock Box Database System | Centennial College, COMP 122 **January 2026 – April 2026**

Oracle SQL Developer, SQL, Microsoft Visio, Database Design

- Designed a normalized 15-table relational database for a subscription e-commerce platform covering customers, orders, payments, shipping and returns
- Enforced data integrity with primary/foreign keys and NOT NULL, UNIQUE and CHECK constraints
- Wrote SQL queries and business reports for cart management, shipment tracking, monthly sales analysis and customer segmentation
- Optimized query performance with indexes and automated business rules using database triggers (return eligibility, active subscriptions)
- Modelled conceptual and logical ERDs in Microsoft Visio and translated them into a working Oracle database

WORK EXPERIENCE

Risk Associate | Aritzia, Toronto, ON **March 2025 – July 2026**

- Analyzed operational and business risks to identify potential issues and support data-informed decision-making
- Prepared reports, dashboards and presentations communicating performance trends and key issues to stakeholders
- Investigated operational discrepancies using structured problem-solving and strong attention to detail
- Upheld compliance with internal policies and procedures in a fast-paced retail environment
